

Trash Removal Gallaudet University

Challenge: Collect trash on weekend basis and to maintain trash rooms clean.

Solution: Put together a dedicated team and condition a custom 5500 RAM truck to collect all campus dormitories trash; Implement a periodic power washing service on trash bins and trash rooms

Location: Washington, DC

Trash removal service is another service that our company can provide. This service is provided as a subcontract during the weekends. This special project involved putting together a team of two crew members and a custom dump RAM 5500 diesel truck built with extra 4 ft all around metal walls and custom gate designed easily to open when dumping.

This service starts around 6:00 am on the weekends collecting all Campus dormitories trash that comes through the trash chutes, followed by power washing trash bins and trash rooms on regular basis. It is important to power wash to prevent bad odors from building up and to prevent pest infestations.

In addition, every other time, the whole trash room is sprayed with a chemical made by NCL laboratories, Nature's Solution which produces enzymes which rapidly destroys odors, remove organic stains, and liquefies grease. This product incorporates biodegradable surfactants, chelating aids, penetrants, odor counteractants and non-pathogenic, highly active bacteria cultures for superior deodorization, organic spot removal and grease digestion.

For trash removal services, like the one described in this case study, please do not hesitate to contact us (703) 491-1462 or at Contact@Commercial1Services.Com.
